

1. If I want to purchase something, I will when I want to and not have someone trying to shove it down my throat. Also, I do not want to know that someone maybe trying to scam our elderly.
 2. I had the wonderful experience of being told to F..K OFF by a vendor doing cold calls by computer dial outs. Do YOU want a child picking up the phone and hearing that. You had a major problem when Dale Earnhardt Jr. said the word Sh*t..hmmm Sh*t or F-K OFF.
 3. I'm also very tired of these bogus charities calling in the name of my local Fire, First Aid and Police. Well I support these groups in my town in my own way....I don't want some lying cheats trying to rip me and others off with their lies, telling me I donated last year to them. Ask them for their POB # or permit..they hang up immediately. How much have they ripped off of innocent people who believe this is really going to help these groups. STOP THEM NOW! DO NOT GET RID OF "DO NOT CALL"
 4. I want my privacy...simple as that. That means if I don't want you to call me, I don't want you to call my home phone, cell phone or send you spam to my e-mail. That's why I signed up for the "DO NOT CALL" I deserve my privacy and it's being taken away from me. FCC nor any other gov't agency has the right to take that last shred of freedom from me...my privacy. If you want to get rid of it ...then please publish your home and cell numnbers, so that when I get unwanted calls, I can give them your numbers. And please...do not tell me to ignore the call...I have elderly parents and if one of these callers causes me to miss an emergency call(immediately) regarding my family...please have a good answer why you dropped DO NOT CALL, because certain groups wanted it for revenue purposes is not going to cut it vs. what the citizens and tax payers of NJ do not want.
- Thank you for considering MHO.
